VIRTUAL REALITY

The Pixoul Planet VR houses 10 different virtual and augmented reality games, including everything from shooters, and virtual roller coasters, to guided spaceship tours of the new intergalactic planet, Pixoul. Available in both story and arcade mode, the multi-sensory game is built on preserving the future city, Pixoul Planet, which is under attack and calls for help from visitors.

Across these ten integrated experiences, each lasting 6-10 minutes, there is a never seen before the journey of flight & racing simulators, escape rooms, shooting games, paragliding, and rollercoasters, promising to push the boundaries of human imagination and set new standards of interactive and immersive entertainment.

Pixoul Gaming has introduced the region's first fully wireless headsets in an open world cross-platform metaverse. With no unnecessary cables or heavy backpacks, the HTC Focus 3 headsets are fully synced with 4D and motion platform simulators to blur virtual reality's boundaries ultimately.

STORY MODE

The story starts with the catastrophic news of corruption, plague, war, and diseases spreading across Earth, where four scientists gather their efforts into creating a new technology that could power intergalactic travel and set a path into what would be called Pixoul Planet.

The mission launches the four founders and a thousand hand-picked people representing humanity's variety and condensed knowledge. Upon a rough landing, they distribute manpower and resources and use the newfound Pixoul Technology to power the construction of the new planet.

After years of construction, they build Legacy City, a sustainable green city that suffices the population's needs but at the cost of the health of the founders. After entering Cryo Chambers to sleep for a year and re-generate their strength, when they are woken by ERIC, their Emotionally Recuperating Indestructible Companion, he guides them on their mission to defeat the enemies and reclaim their freedom.
